

RIEDL
PHASYS

- > NO CABLE
- > FULL WIRELESS
- > SUPER FAST & FLEXIBLE

HIGH TECH

RIEDL PHASYS (PHarmacy Automation SYSTEM) was born from the collaboration between a group of German engineers active for twenty years in the field of pharmacy automation and the leader company in Italy for hospital automation, with over ten years of experience in the application design and in technical services.

The technology represents the best available on the market in terms of performance, precision and reliability.

Simpler, cheaper and more reliable: these are the characteristics that make **RIEDL PHASYS** the best pharmacy automation system.

- > highly innovative gripper
- > full wireless, no cables
- > high performance
- > extremely reliable
- > simple, modular and flexible
- > low start-up and operation costs

RIEDL
PHASYS

> gripper of highly innovative technology

> self-solve of misalignment packs

Simplicity and **efficiency** are the paradigms of the new system **RIEDL PHASYS**.

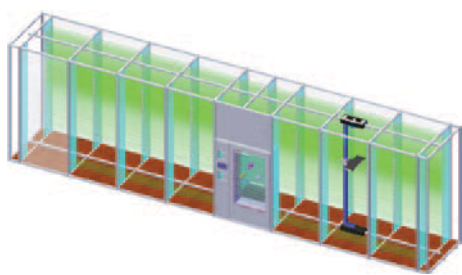

All the technology is concentrated in the gripper, powered directly by the moving

axes and connected to the controller server via a **Wi-Fi network**.

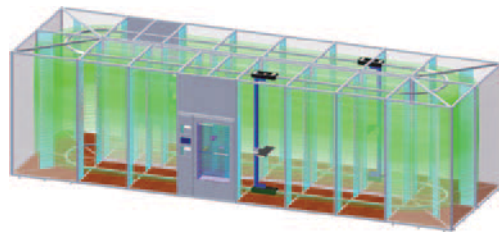

All the rest is just “furniture”, which does not need any special maintenance.

The revolutionary features of **automatic alignment of the packs** and **self-leveling of the shelves** ensure the continuity of the service, eliminating inefficiencies and machine frequent stops, typical of all other automation systems.

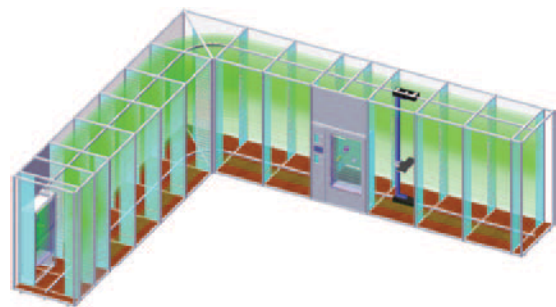

**SIMPLE
AND
RELIABLE**

RIEDL
PHASYS

Our staff of technicians and architects is at the service of your pharmacy to study the best layout of the automatic warehouse.

RIEDL PHASYS is **designed and tailored according to the needs of your pharmacy**, in terms of space and number of packages handled daily.

RIEDL PHASYS is extremely flexible and can adapt to any local, using the full available height in order not to waste useful space.

The affordable cost of the system and low consumptions allow a quick return of investment.

- > tailored to your pharmacy
- > affordable cost of purchase, maintenance and operation
- > low consumptions
- > quick ROI

MODULAR AND ECONOMICAL
